

# BLACK PEARL PASTA

FAST ACTING PASTE BAIT  
AGAINST MICE

## Regulatory information

Product type	PT14 – Rodenticide
Formulation type	Ready to use (RB) paste bait
Active substance	Alphachloralose (CAS No. 15879-93-3)
Concentration	4 % w/w
Bittering	Denatonium benzoate 10ppm
Approved name	BLACK PEARL PASTA
Targets	House mice ( <i>Mus musculus</i> )
Application	Use inside private, public and agricultural buildings.

## Indications

**BLACK PEARL PASTA** is a paste bait made from microencapsulated alphachloralose. This innovative process offers enhanced palatability and intelligent delivery of the poison to its target for a stunning effect. The alphachloralose contained in **BLACK PEARL PASTA** is a hypnotic. Swallowed by mice, it induces a general slowing of their metabolism: heart rate reduction, respiratory rhythm reduction, hypothermia. The mice fall asleep, fall into comas and die in their sleep.

## Strengths

- Fast action.
- Alternative to anticoagulants.
- Only 0.15 g of bait is needed to kill a 20 g mouse.  
(2 to 7 times less than with an anticoagulant)

## Instructions for use

The product must be used in secure bait stations (general public and all professionals) or in bait stations providing the same level of security as bait stations (rodent control professionals only). The number of bait stations depends on the treatment site, the geographical context, and the size and severity of the infestation.

**For mice :** 10 g to 20 g of product spaced 3 to 5 meters apart, depending on the level of infestation. Adjust the number of sachets to the treatment to be carried out. Inspect and replenish the bait boxes a few days after the first application, then once a week as long as the bait is consumed.

**ACT** ACTIVE  
CAPSULATION  
TECHNOLOGY

## Packaging

1 kg bucket (10 g sachets)

## Disposal

*Do not discharge this product into the environment or down the drain. Dispose of this product and its container only with due care. Once treatment is complete, dispose of uneaten bait and packaging through an appropriate collection system. Packaging that has come into contact with the product must not be reused or recycled. Dispose of used bait stations at a waste disposal center or other appropriate collection center. Search for and dispose of dead rodents during treatment, at a minimum, every time the bait stations are inspected. Rodents can carry diseases. Do not touch dead rodents with bare hands; wear gloves or use instruments such as tongs to dispose of them. Dispose of dead rodents in accordance with local regulations.*

## Safety instructions

**PT14** - Use biocides safely. Always read the label and product information before use. Dangerous. Follow safety instructions.

The safety data sheet is available free of charge on request from the following address: [fds@lodi.fr](mailto:fds@lodi.fr). For first aid instructions, contact the nearest poison control centre.
