

JADE PASTA

RODENTICIDE PASTE BAIT WITH 0.005% of BROMADIOLONE, AGAINST RATS AND MICE

1. COMPOSITION

Active ingredient **Bromadiolone** 50ppm (=0.005%w/w)
Formulation type Fresh paste
Colour Green

2. MODE of ACTION

BROMADIOLONE is a 2nd generation anticoagulant molecule. It acts disturbing Phytomedianone (Vitamin K1) cycle. It is a very effective anti-coagulant, intended to fight against rats and mice. BROMADIOLONE action is not immediate. Symptoms appear after a few hours and the rodents die after several days.

3. INTENDED USES

Jade Pasta is intended to be used against **rats** and **mice**.

4. INSTRUCTIONS FOR USE

Mode of use:

Place Jade Paste in bait stations, in all places where there are signs of rodent activity: along walls and in quiet corners, between nests and feeding places. Do not place the baits in open areas. Protect them from humidity.

Regularly check bait consumption and replace consumed or spoilt bait until consumption has stopped.

Application rate:

Brown Rats, House Rats: Secure 60-100g of bait in covered, tamper resistant baiting stations spaced 10m apart (5m apart in areas of high infestation)

House Mice: Secure 20-30g of bait, in covered, tamper resistant baiting stations spaced 5m apart (2m apart in high infestation areas)

5. PACKAGING

5Kg buckets (500x10g sachets)

6. PRECAUTIONS FOR USE

Use biocides safely. Always read the label and product information before use.

Use only in accordance with the directions on the label. Read thoroughly the MSDS before use.

Prevent access to bait by children, birds and non target animals, particularly dogs, cats, pigs and poultry. Keep out of reach of children
