

# RUBIS PASTA

FRESH PASTE AGAINST RATS AND MICE  
READY TO USE

## Description

**Class of product :** TP14 - Rodenticide  
**Formulation :** Fresh paste bait - Ready to use  
**Active substance :** Difenacoum (CAS Number : 56073-07-5)  
**Concentration :** 0,005% w/w  
**Bittering agent :** Denatonium Benzoate 10ppm

## Regulatory information

**Name :** Rubis Pasta  
**Registration number :** FR-2012-0033 / Professionals of rodent controls  
**Targets :** Rats (*Rattus norvegicus* and *Rattus rattus*), Mice (*Mus musculus*)  
**Application :** Use indoors, around buildings and infrastructures, waste centers and sewers. Use in opened areas directly inside the burrows in case of heavy infestation.

## Mode of action

Difenacoum is a second-generation anticoagulant product . The rodents die from internal bleeding. First symptoms appear from a few hours after ingestion and death from 3 to 14 days later.

## Instructions for use and doses

The product must be used in secure bait station (mainstream and professionals) or in bait stations providing the same level of safety (only by professionals of rodent control).

The number of baiting points depends on the site of the treatment, the geographical context and the level of the infestation.

- Against rats : 90g to 100g of product spaced from 5 to 10 meters
- Against mice : 20g to 30g of product spaced from 3 to 5 meters

Adapt the number of 10g sachets to the treatment to be performed. The cartridge delivers ribbons of paste, indicatively 30cm correspond approximately to 30g of product.

The use is also permitted in open areas directly inside burrows in case of heavy infestation. Inspect and replenish the bait stations a few days after the first application, then once a week as long as the bait is consumed.

## Elimination

Do not dispose of this product and its container without taking all precautions of use. Do not discharge the product into the environment and the pipelines. Deposit used bait stations in a dump or other appropriate collection center. Packaging that has been in contact with the product must not be reused or recycled.

## References & Packaging

Ref. R5023 - 10g sachets in 5kg bucket

## Precautions for use

Use rodenticides carefully, before use, always read the label and product information. Dangerous. Respect precautions for use. The safety data sheet is available free on request at the following address : [fds@lodi.fr](mailto:fds@lodi.fr)

Wear the recommended personal protections. Do not use for other than authorized use. Product for exclusively biocidal use, not use in the phytosanitary field (plant protection).

### Note :

Are regarded as bait stations, the boxes where the bait can't be accessed by children and non-target organisms. In addition, a closing device must be provided to prevent its opening by children.

Are regarded as bait stations, devices that provide the same level of protection for humans and the environment as bait boxes, thus avoiding direct contact bait with the environment. These devices must be designed to keep bait inaccessible to the general public and non-target animals, and protect them from severe weather.

Bait stations containing RUBIS PASTA must be labeled with the following information :

Don't open the box. Keep out of range of children. Keep the product separated from food and drink, included those for animals. In case of contact, contact a poison center. In case of ingestion, rinse the mouth with clear water. Don't make it throw up. In case of ingestion, show the label and/or the packaging to the doctor. In case of inhalation, breathe some fresh air and rest. If unconscious, immediately contact a doctor and show him the label and/or the packaging. In case of contact with the eyes or skin, wash immediately and profusely with clear water. For the Doctors : this product includes an anticoagulant rodenticide, a treatment with K1 vitamin may be necessary for a long period.
