

KRYPTO GEL

GEL WITHOUT ACTIVE SUBSTANCE FOR RODENT DETECTION

Placebo bait with fluorescent tracer
for rats and mice

Composition

Mixture of flour and flavoring agents in the form of a fluorescent green paste.

Indications and application

KRYPTO GEL does not contain any active ingredients. It does not kill rodents. **KRYPTO GEL** is used for three purposes :

- Detect the presence of rodents in a given area and only treat the areas that are actually infested.
- Monitor the resurgence of rodent populations after a successful rodent/mouse extermination operation.
- Trick wary rodents into getting them used to a diet in the form of a harmless gel, and then eliminate them very effectively by replacing the placebo gel with a rodenticide bait..

THE ADVANTAGES OF A FLUORESCENT TRACER :

For even greater performance in detection actions, **KRYPTO GEL** makes urine fluorescent !

Specially designed to attract rodents, the paste is formulated in an original way, it contains a substance that accentuates the fluorescence of urine under UV lamp. Thus, **KRYPTO GEL** becomes an effective and indispensable tool for detecting a rodent infestation, allowing a careful inspection of the premises before implementing effective control measures.

Instructions for use

Preferably use bait stations to clearly identify where the **KRYPTO GEL** is placed, and to accustom the rodents to entering the stations to feed there.

Detection :

- Place the equivalent of a nut of **KRYPTO GEL** per workstation and check regularly.
- No consumption: continue regular checks by changing the bait when it loses its freshness.
- Consumption: undertake a control operation.
- Verification of fluorescent traces: using a UV lamp, the verification of the presence of rodents can be refined: details on places of passage, places where the colony nests, soiled goods, etc

Lure :

Apply **KRYPTO GEL** to the baiting areas, just as you would a rodenticide gel. If the gel is consumed, you can then switch to a gel with a rodenticide active ingredient.

Packaging

310 g cartridge - Box of 12 units

Special precautions

Although **KRYPTO GEL** does not contain any active ingredients, but is not a food product; it is therefore advisable to keep it out of reach of children and pets. Store in the original packaging away from heat and moisture.
