

EMEROD

PROTECTEUR GAINES ET MOUSSES

ANTI RODENT SPRAY

SPECIALISED SPRAY TO PROTECT ELECTRICAL CABLING AND INSULATION MATERIALS FROM RODENT ATTACK **FOR UP TO 6 MONTHS.**

1. PRESENTATION

EXCLUSIVE FORMULA. Contains a protective resin.
Acts both as a smell and taste deterrent.
Long lasting protection of up to 6 months. Colourless. Easy to use.

2. APPLICATION

EMEROD Anti Rodent Spray contains a specially formulated vaporised solution that once sprayed forms a **protective film**.
Simply spray onto the surface of the material to be treated.
Rodents will **no longer chew or bite** into the treated area.

Preventive application on plastic sleeves, rubber hoses, electrical cable jackets or transmission cables, insulating foams, etc.

An ideal product for **domestic, commercial, industrial properties as well as farm machinery** where rodents (rats, mice, weasels, martens, squirrels...) might bite through cabling or insulation.

3. MODE OF USE

- . Important: Ensure power is switched off before application to cables.
- . Shake before use. Spray directly on the surfaces at a distance of 30 cm.
- . Once dry, the surfaces are covered by a protective film.
- . Repeat every 6 months or more frequently if the area is covered in dirt or dust.
- . Do not spray on tension cables.
- . Spray away from all operating electrical devices.

4. PRECAUTIONS OF USE

Dangerous. Comply with the mode and precautions of use. Read label and information concerning the product before use. Read the safety data sheet (available on request to the following email address: fds@lodi.fr).

Avoid all unnecessary exposure. Wear adequate protective equipment (clothes, gloves and mask). It is always advised to realize a test onto the surface. Pre-test carefully prior to use in an inconspicuous area before total treatment.

5. PACKAGING AND REFERENCES

Available in 300ml, 400ml or 500ml aerosol.
