

# SECURE TRIANGULAR MOUSEBOX

## MOUSE BAIT STATION

### Presentation

This tamper-evident bait station is designed to secure most rodenticide baits. Its metal rod keeps the pastes and blocks securely in the boxes.

The **Secure triangular mousebox** is practical and sturdy. It consists of a tunnel and two slots. It can be discreetly placed in corners.

### Strengths

- **Very robust, water-resistant bait station.**
- **Suitable for most bait blocks and pastes.**
- **Tamper-proof, it has a secure closing system.**
- **Effective and practical indoors and outdoors.**

### Instructions for use

The bait station is secure. Once the top is closed, the station is locked; it opens with a special key provided with the station. Securely closed, the station cannot be opened accidentally (by children or non-target animals, for example).

### Packaging

**Ref R3231** : Box of 100 units

### Technical characteristics
