

VICTOR® MULTI-KILL™ ELECTRONIC MOUSE TRAP

ELECTRONIC TRAPPING SYSTEM
FOR MULTIPLE CAPTURES
WITHOUT BIOCIDAL ACTIVE SUBSTANCE

Presentation

Electronic multi-capture trap for controlling mice. The highvoltage electric discharge kills mice more humanely, in just a few seconds.

- Each program allows you to eliminate up to 10 mice.
- One set of batteries can kill up to 150 mice.
- 100% elimination rate.
- Elimination without touch or visual contact.

Instructions for use

Easy to use, simply add a food bait (e.g. peanut butter), place it against the wall and turn it on.

The trap uses advanced intelligent circuit technology that detects when a rodent enters the unit. Once the rodent is inside, the system delivers a high-voltage shock that effectively kills it.

The **Victor® Multi-Kill™ Mouse Trap** has two entrances and no exits. Mice climb one of two staircases to reach the Shock N' Drop Chamber™, where the bait and metal plates are located. Inside, the patented tunnel structure and beveled columns trap the mouse. It then moves forward onto the metal plates to reach the bait. This contact completes the electrical circuit and triggers a high-voltage discharge that kills the mouse in seconds.

The chamber then automatically rotates to deposit the mouse into a collection drawer and resets for the next mouse.

A green light will turn on when a mouse has been caught and you can get rid of it.

Characteristics

- High voltage electric shock kills rodents in seconds.
- Place bait, set the trap, set it and then empty it
- Each program allows you to eliminate up to 10 mice.
- One set of batteries can kill up to 150 mice.
- The beveled columns keep the mouse captive and prevent it from escaping.
- Built-in safety switch and tunnel design protect children and pets.
- 100% elimination rate.
- The green light flashes for 7 days to indicate a capture.
- The yellow indicator light flashes when the collection drawer is full.
- The red indicator light flashes when the batteries are low.
- Elimination without visual or tactile contact.
- Indoor use only.
- The trap is reusable.
- Requires 4 "C" type batteries (included).
- The two staircases allow a double entrance.
- Shock N' Drop compartment swivels to drop mice into the drawer.
- The collection drawer contains the mice until it is emptied.

Packaging

Ref R0912 : VICTOR® Multi-Kill Electronic Mouse Trap
Box of 2 units

Step 1 : Insert the batteries
Step 2,3 : Put the bait
Step 4 : Position

Step 5 : Turn on
Step 6 : Empty
