

# VICTOR® ELECTRONIC MOUSE TRAP

ELECTRONIC TRAPPING SYSTEM  
WITHOUT BIOCIDAL ACTIVE SUBSTANCE

## Presentation

Fast method for killing mice. Very economical, this trap kills 100 mice per set of batteries. Can be used anywhere indoors.

- High voltage discharge kills a mouse in 5 seconds
- Easy to use
- Poison-free

## Instructions for use

Easy to use, simply add a food bait (e.g. peanut butter), place it against the wall, and turn it on. The trap uses advanced smart circuit technology that detects when a rodent enters the unit. Once the rodent is inside, the system sends a high-voltage shock that effectively kills it. A green light will turn on when a mouse has been captured and you can dispose of it.

Step 1, 2 et 3 : Insert the batteries

Step 4 : Put the bait

Step 5 : Position

Step 6 : Turn on

Step 7 : Empty

## Characteristics

- Kills 100 mice per set of 4 AA batteries.
- High voltage discharge kills a mouse in 5 seconds.
- Beveled columns trap the mouse for a 100% success rate - no animal can escape !
- Easy to use: simply add the bait, light the trap and empty it.
- Intelligent circuit technology that detects the mouse and gives it an electronic shock.
- Patented 2-plate design.
- The lid opens to avoid touching the rodent.
- Built-in safety switch and tunnel design keep children and pets safe.
- Without poison.
- A flashing green light indicates that a rodent is captured and dead.
- A flashing red light indicates that the batteries need to be changed.

## Packaging

**Réf R0911 :** VICTOR® Electronic Mouse Trap  
(Box of 4 units)
