

DIATOMACEOUS EARTH

100% NATURAL POWDER,
ANTI-HUMIDITY, DESICCANT

Product usable in Organic Farming
under Regulation EC 2018/848

Indications

DIATOMACEOUS EARTH is a 100% natural powder made of fossilized abrasive microalgae, diatoms. The siliceous skeletons naturally absorb moisture in large quantities. Absorbent and anti-caking action. **DIATOMACEOUS EARTH** naturally dries environments within 3 days.

Strengths

- 100% natural powder.
- Can be applied in environments of pets or any other premises housing domestic animals.
- Naturally dries environments in just 3 days.

Instructions for use

Sprinkle **DIATOMACEOUS EARTH** in the areas to be treated at a rate of 10 to 20 g/m² (i.e., 10 kg of **DIATOMACEOUS EARTH** for a building with 1000 m² of floor space).

- **Indoors:** in cages for pets, kennels, baskets or litter boxes, along baseboards, furniture pieces where pets may pass (sofas, beds, carpets, rugs...), around plants, cracks, and damp corners.
- **In poultry houses and animal shelters:** in nesting boxes, perches, cracks, nests, and damp corners.
DIATOMACEOUS EARTH can be applied in poultry, rabbit, cattle, pig, sheep, and goat farms.
- Inside premises adjacent to storage cells.

Packaging

5 kg bucket
20 kg bag

Safety instructions

Use adequate ventilation and avoid inhaling the dust. Wearing an FFP-type dust mask is recommended. **DIATOMACEOUS EARTH** is used indoors and around buildings. Do not apply directly to animals.
Store in a cool, dry place. Keep out of reach of children. Store in its original, tightly sealed packaging.
