

IMAGO

READY-TO-USE INSECTICIDE BAIT GRANULES
FOR FLY CONTROL IN LIVESTOCK BUILDINGS

PROFESSIONAL USE

Indications

Insecticide bait granules (GB) designed to combat adult flies in livestock buildings. **IMAGO** combines a quick action with long-lasting protection, up to 4 weeks. Its attractive formula contains a sexual pheromone.

Composition

Acetamiprid 5 g/kg

Contains a sexual pheromone: **Cis-Tricos-9-ene**

Strengths

- Shock action.
- 4 weeks of protection.
- Ready-to-use granules.
- 2 kg = 800 m² protected.

Instructions for use

Identify areas where flies land or move (near doors and windows, manure heaps, and slurry) sheltered from drafts.

Place the bait in flat, sufficiently large containers (plates, bowls) at a dose of 25 g per 10 m². For optimal effectiveness, spread the granules without piling them up. Reapply based on the level of infestation.

Do not exceed 6 applications per year.

In dry conditions, spray water on the bait to increase its attractiveness.

Applicable in the presence of animals in areas out of their reach and without direct treatment on the animals.

Packaging

2 kg bucket

Storage and disposal

Store in a cool, dry, and well-ventilated place. Keep out of reach of children.

Collect granules and dispose of them in accordance with current regulations. Do not dispose of residues in sewers or waterways. Do not reuse the packaging. The packaging and product must be disposed of as hazardous waste under the sole responsibility of the waste holder.

Instructions for use

PT18 - Use biocides safely. Always read the label and product information before use. Dangerous. Follow safety instructions.

The safety data sheet is available free of charge on request from the following address: fds@lodi.fr. For first aid instructions, contact the nearest poison control centre.

Place containers out of reach of domestic animals and children. Do not contact food, kitchen utensils, or food surfaces. Wash hands and exposed skin after use.
