

LAQUE CHOC +

INSECTICIDE USED AGAINST FLYING AND CRAWLING INSECTS

READY TO USE

Presentation

LAQUE CHOC+ is a ready to use insecticide used against flying and crawling insects such as ants, cockroaches, fleas, flies, mosquitoes, wasps...

Composition

Prallethrin: 0,75g/L
Cypermethrin: 5g/L
Piperonyl butoxide: 3g/L

Strengths

LAQUE CHOC+ has a fast and long-term action. Thanks to the active substances, insects (adult forms) are knocked-down after few minutes and treated surfaces are protected until 12 weeks.

Application rates

Shake well before use. The product can be applied with a sprayer or with a brush. 1L of the product can treat 20m².

Spray **LAQUE CHOC +** in cracks and crevices, behind plinths, behind electrical appliances (refrigerators, ovens, etc.), on walls, floors, windows frames, carpets, balconies, terraces, and all other contaminated places.

Ventilate during the treatment (to avoid breathing liquid particles), then completely renew the air after treatment before re-entering.

Create a chemical barrier by applying the product on a band of 10 to 15cm around the house, on the edge of windows and doors.

Rinse the sprayer with water after use.

Packaging

Bottle of 500 mL / 1 L / 5L / 10L

Disposal

Do not dispose of the biocide in drains (sinks, toilets, etc.), gutters, watercourses, fields or any other outdoor environment. Dispose of unused product, its packaging and any other waste in an appropriate collection facility.

Safety instructions

PT18 - Use biocides with caution. Read the label and product information before use. Hazardous. Follow safety instructions.

The safety data sheet is available free of charge on request from the following address: fds@lodi.fr
 For first aid instructions, contact the nearest poison control centre.

For outdoor use, do not apply to vegetable gardens or absorbent soil.

For indoor use, ventilate during the treatment and before reoccupying the premises (30 minutes to 2 hours, depending on the ventilation level). Clean the equipment after use.

Wear gloves and wash your hands after use.

Do not spray on/towards humans and animals.

Cover or remove food, dishes, aquariums, terrariums and cages.

Turn off power to aquarium pumps before spraying.
