

# LOCLEAN GEL

*Hydroalcoholic gel recommended by  
the World Health Organization for hand antiseptis*

## Presentation

**LOCLEAN GEL** is a hydro-alcoholic gel recommended by the World Health Organization for hand antiseptis.

## Characteristics

Bactericidal, fungicidal and virucidal activity. Barrier behaviour in preventing the spread of germs. Guidance formula promulgated by the World Health Organization. The antimicrobial activity of the guidance formula has been tested by WHO reference laboratories in accordance with European standards EN 1500. The antimicrobial activity for hygienic hand antiseptis is equivalent to the reference product (isopropanol 60% v/v).

When hand washing is not possible, hydro-alcoholic products are among the most effective solutions for the rapid and efficient inactivation of a wide range of microorganisms that may be present on the hands.

## Instructions for use

For dermal application only.

Fill the palm of one hand with the gel and rub all surfaces of the hands until the skin is dry. Pour the necessary amount of gel into the palm of the hand :

- 3mL minimum or 1 palm in the frame d'un hygienic treatment
- 2 x 3mL minimum, i.e. 2 handshakes in the frame d'une surgical disinfection

In accordance with the recommendations indicated in standard EN1500, rub the hands for a minimum of 30 seconds in hygienic treatment and 2x45 seconds in the context of surgical disinfection. The application should be carried out on both hands, rubbing until the hands are dry.

Do not rinse, do not dry.

## Composition

Ethanol 79.99g/100g - hydrogen peroxide - glycerol  
Biocidal product for human hygiene (TP1)

Storage before opening :  
At room temperature (15°C to 25°C): 2 years from date of manufacture.

## Packaging
