

# ANTI BEDBUGS MATTRESS COVER

Block 100% of allergens, mycotoxins, mites and bed bugs

## 1. PRESENTATION

The mattress covers and pillowcase **CleanRest® PRO** allow entire protection against allergens, mycotoxins, mites and bedbugs.

In preventive action, the covers **prevent installation and infestation of bedbugs** into mattress. These also permit to detect bedbugs easily and precociously in order to avoid severe infestation.

## 2. PATENTED TECHNOLOGIES

Fitted with the MicronOne® patented technology, the covers permit a **filtration of the allergens until 1µm**. This filtration prevents the transfer of mites, dusts or mold spores.

The covers also have a unique **closing system ZIP-N-CLICK™** allowing a secured closing. Indeed, closing point is the most vulnerable place since it is the bedbug entry point. The closing have a sufficiently large zipper tab for an easy setting up. Once closed, a “click” sound ensures that the mattress cover or pillowcase is totally hermetic.

**Zip-N-Click™**

## 3. PRODUCT ADVANTAGES

- Filtration of insects and particles until 1 micron.
- Very comfortable and sweet fabric
- Professional quality
- Extensible in length and width (mattress thickness of 20 to 50 cm)
- 10 years guaranteed
- Waterproof and breathable
- Machine washable
