

# ORIGIN MINERAL POWDER SPRAY

AEROSOL WITHOUT INSECTICIDE  
ACTIVE SUBSTANCE BASED ON  
VOLCANIC ORIGIN MINERAL.  
EFFICIENTLY ELIMINATES CRAWLING INSECTS.

## Presentation

100% natural powder composed of a volcanic origin mineral belonging to zeolites. Without insecticidal active substance according to Regulation (EU) 528/2012.

## Strengths

- 100% mineral powder without free silica.
- No insecticidal active substance.
- Specifically designed for habitats and animal dwellings.
- Application through physical contact.

## Targets

Crawling insects: cockroaches, ants, spiders, silverfish, fleas, bed bugs, red mites.

## Utilisation

Without insecticidal active substance, **ORIGIN MINERAL POWDER AEROSOL** can be used indoors and around homes to effectively combat bed bugs, cockroaches, silverfish, and other crawling insects, especially in places where the use of conventional biocidal insecticides is prohibited or undesired. The product can also be used in animal environments (chicken coops, kennels, dog houses, stables) to eliminate fleas, red mites, etc.

## Action

Formulated with an inert volcanic origin mineral substance, with no chemical or biological action, acting through a physical process. The unique mode of action of **ORIGIN MINERAL POWDER AEROSOL** causes the obstruction of the respiratory pathways of crawling insects. It also positions itself at their joints, hindering their movement and preventing them from feeding.

It is recommended to perform a test on sensitive surfaces before completing the entire application.

## Reference and Packaging

**Ref. I8722:** Aerosol 500 ml - Carton of 12 units

## Instructions

Shake the aerosol vigorously before use until the beads detach. Spray a fine layer on the areas to be treated: under furniture, cracks and crevices likely to harbor insects, ventilation openings, baseboards, mattress supports, and seams, etc. Reapply the product in case of cleaning or rubbing of the treated areas. Clean the dispenser. Ventilate the premises well during and after application (approximately 30 minutes to 2 hours depending on the level of possible ventilation). After use, turn the aerosol upside down and press to prevent the valve from clogging. One aerosol can treat 100 linear meters.

## Precautions

Before use, read the label and product information. Follow the precautions for use. For first aid instructions, contact the nearest poison control center. Consult the safety data sheet, available for free upon request at the following address: [fds@lodi.fr](mailto:fds@lodi.fr).

It is recommended to wear appropriate protective equipment to avoid skin, eye, and personal clothing contamination when applying the product. Use adequate ventilation, ventilate during application, and avoid breathing in the dust. Wash hands after each use. Store in a well-ventilated place. For first aid instructions, contact the nearest poison control center. Do not spray near live electrical equipment. Use only when the equipment is not live. Wait 5 minutes before re-energizing the equipment.

Store in a cool, dry place. Keep out of reach of children. Use only for intended purposes. Dispose of the empty aerosol or the one containing product according to current regulations. Do not dispose of residues in the environment, sewers, or watercourses.
