

HEXA TRAP

INNOVATIVE TRAP
TO ATTRACT AND CAPTURE MOSQUITOES

Presentation

Hexa Trap is an innovative solution to control mosquitoes in outdoor spaces. Thanks to its advanced design and cutting-edge technologies, **Hexa Trap** offers simple, effective and long-lasting protection against all types of mosquitoes, ensuring peaceful outdoor moments.

Mode of action

Hexa Trap is a trap designed to attract and capture female mosquitoes, thanks to its refill/lure and high-performance fan. Operating without blue light, it targets only common and tiger mosquitoes without attracting other insects, providing a practical and long-lasting protection for your garden.

Hexa Trap is easily programmable to 4, 6 or 12-hour cycles via the integrated control screen and offers protection for up to 1000 m². Its large, transparent drawer makes it easy check the plugs. It's also easy to empty and clean.

Strengths

- Easy to use mosquito trap.
- 24-hour protection.
- 1 trap = up to 1000 m² protected.
- 360° broadcast.
- 1 refill = 3 months of protection (3 x 1 month).
- Attracts only mosquitoes.
- Weather resistant.
- Quiet and odorless.

Instructions for use

Using the syringe, insert a dose of gel into the dedicated trap container (each refill contains 3 doses of gel / 1 dose (10 g) = 1 month of protection).

Plug in **Hexa Trap** and make sure it is correctly installed in your garden: the trap must be placed in the shade as possible, in a cool, damp area close to trees or shrubs, on a level surface. Keep a clear space above the trap.

Select the desired operating time by pressing the corresponding button (4/6/12h) on the control panel. **Hexa Trap** is ready to attract mosquitoes and capture them in its dedicated compartments.

Check the transparent drawer regularly to monitor captured mosquitoes, and empty it into the dustbin if necessary. Renew the dose of gel after a month.

References and packaging

Ref I4055 : Hexa Trap - Unit

Ref I4056 : 30g syringe (= 3 doses)

Technical characteristics

Outdoor use.

IPX4 rating: the trap is protected against rain. High-performance fan and backflow barrier.

Weight : 4,2kg

Dimensions : L 42 x W 38 x H 30 cm

Power supply : DV 12V, 3 watt

Supplied with a 10 meter power cable. Low power consumption.

2 years warranty.

Period of application :

Turn on your **Hexa Trap** during the breeding season (spring to autumn) as soon as the temperature approach 15°C to capture as many females as possible and limit reproduction.
