

RACAN SOURICIDE FOUROYANT

Alphachloralose bait to fight against mice- Amateur and Professional use
Exclusive encapsulation process

1. COMPOSITION and CHARACTERISTICS

Active substance **Alphachloralose** 4% w/w (CAS: 15879-93-3)
Appearance Red bait (**oats**)

2. MODE of ACTION

Alphachloralose is a hypnotic substance. Incorporated into the grain bait formulation, Alphachloralose acts as a sedative by inducing mice' sleep (it slows their heart rate). The rodents suffer hypothermia, and then they fall and die. The action is **lightning**.

Thanks to an **innovative process** (**patent** registered), Alphachloralose is **encapsulated**, the product is more palatable and the active substance is released of the capsule directly and intelligently to its target.

Mice usually shell cereal grains. **RACAN SOURICIDE FOUROYANT** is made of oats whose bark was removed; mice eat the grain and swallow the active substance as well.

3. INDICATIONS & APPLICATION

Targets: **Mice** (*Mus musculus*)

To be done before treatment: before and during the treatment, remove all food from the area to be treated, including pet food.

Baiting points: place bait where there are signs of rodents activity. Place between 10g and 25g of grain bait every 5 metres apart to 3 metres in case of high infestation. Prevent access to bait by children and animals, preferably using appropriate bait boxes.

Dispose the baits in infested area and places liable to be infested, for example along walls, near burrows or where there is food (kitchen, attics...) and there are signs of activity such as prints, holes or droppings. It is recommended wearing gloves. Wash hands after handling.

Baits renewing: Mice don't like soiled baits (i.e. with urine). Consequently, it is very important to regularly renew the bait. Don't wait for the total bait consumption. Check regularly and renew the consumed bait, until consumption has stopped.

Disposal: At the end of the treatment, remove the remaining of bait and dispose of according to current local or national regulation. Respect instruction for use

4. INSTRUCTIONS FOR USE

Use rodenticides safely. Always read the label and product information before use. Safety data sheet is free available on request at fds@lodi.fr. Store in the original container, out of the reach of children. Do not re-use empty packing. Do not dispose of into drains.
