

# FORCE INSECTS+

100% VOLCANIC MINERAL POWDER  
FOR THE TREATMENT OF CRAWLING INSECTS  
FOR PREVENTIVE AND/OR CURATIVE USE

## Indications

**FORCE INSECTS+** is a powder made from chabasite, a 100% volcanic mineral. It acts via a **unique physical process**, without chemical or biological action. **FORCE INSECTS+** operates with a sole mode of action obstructing crawling insects respiratory tracts. The powder also accumulates in insects joints making their movements uncomfortable and preventing them from feeding.

The powder remains effective as long as it is not dispersed.  
**FORCE INSECTS+** is odorless, GMP+ Feed Quality (approved for animal feed), and therefore safe for pets.

**FORCE INSECTS+** can be used as a preventative and/or curative treatment. The product is suitable for use in organic farming in accordance with Regulation (EC) 2018/848.

## Instructions for use

**FORCE INSECTS+** can be applied inside and around houses, in backyards and animal housing: along baseboards, on window sills, in nests, perches, cracks and wet corners. Apply the product directly via broadcasting or with a manual duster.

### Red mites / darkling (litter) beetles:

In poultry housing, apply in the treatment areas : on the perches, in the nests and nest boxes, near the feed distributors, on the ground or in the litter, in wet corners. In case of low infestation, apply 10 g/m<sup>2</sup> and in case of heavy infestation, apply 20 g/m<sup>2</sup>.

### Ants:

Apply to the bottom of doors, cracks, terraces, around garbage cans and directly in the anthill if possible.  
Apply 50 g/m<sup>2</sup> or 5 g per meter on a strip of 10 cm.

### Bedbugs:

Apply to hidden areas (cracks, along baseboards, bed slats, and corners of the room). Dose: 20 to 50g/m<sup>2</sup> depending on the degree of infestation.

### Mites:

Apply to window sills, bottoms of doors, behind cupboards, in cracks, under sinks, tubs, along baseboards and throughout pets' surroundings. Apply 50 g/m<sup>2</sup> or 5 g per meter on a strip of 10 cm.

If necessary, vacuum to remove the powder.  
Renew the application after dispersion of the powder or if it has taken on moisture.

## Strengths

- 100% volcanic mineral powder.
- Knock-down and long-lasting action.
- Can be used in organic farming.
- Can be applied while the animals are present.

## Packaging

5 kg bucket

## Safety instructions

Store away from humidity.  
Wearing gloves is recommended.  
Wearing an FFP2 type dust mask is recommended.  
For outdoor use, the powder must remain dry to stay effective. If the powder becomes wet, remove it and replace with dry powder.
