

CAPTURA

MULTI-CATCH RAT TRAP
PROFESSIONAL MECHANICAL TRAP
IDEAL FOR SENSITIVE AREAS

Presentation

CAPTURA - Multi-catch rat trap is a mechanical device designed to provide an effective solution for managing rodent infestations. Without the use of rodenticide baits, this device allows for the successive capture of rats, with a capacity of up to 40 individuals. Its intelligent mechanism is based on a rotating platform that is automatically activated by the presence of the rodent.

Designed for pest control professionals, this trap ensures continuous control, ideal for sensitive environments such as food processing facilities, healthcare establishments, or public places.

Strengths

- **Multi-catch:** up to 40 rodents captured without manual reset.
- **Mechanical solution,** no active rodenticide substance.
- **Smart electronics:** control screen with counter and battery gauge.
- **Safe:** suitable for sensitive environments.

Mode of action

1. The rodent is attracted by bait placed in different compartments (feeder, platforms, ladders).
2. When accessing the feeder to eat, the rodent enters the trap and triggers the sensor.
3. The tilting mechanism is activated via the rotating platform, trapping the rodent in the lower tray.
4. The system automatically resets itself, ready for another capture.

How to use

1. Preparation of the capture liquid:

Mix 5 L of EMEROD Preservative solution + 10 L of water in the collection tank.

2. Winding the mechanism:

Turn the knob clockwise until it stops (without forcing it).

3. Installation of bait (non-rodenticide):

- On the rotating platform.
- In the feeder.
- In the small/large bait holders.
- On the access ladders.

4. Start-up:

- Insert 2 protected 18650 Li-Ion batteries (not included).
- Hold down the ON/OFF button for 3 seconds.
- Reset the counter if necessary (R button, 3 sec).

5. Advice:

Leave the trap switched off for several days to allow odors to permeate and reduce the rodents' wariness.

Technical specifications

Capture capacity	Up to 40 rodents
Power supply	2 protected 18650 lithium-ion batteries (not included)
Control screen	- Battery gauge - Digital counter 0 to 40 - Flashing indicator light
Control buttons	- On/Off (I/O) - Reset (R)
Exact dimensions	H: 65.5 cm Length: 34.7 cm Width: 43.5 cm
Weight	8 kg
Materials	ABS plastic, polypropylene, and silicone. Designed for harsh environments.
Included in packaging	A shovel, a cleaning bag, a user manual
