

PHOBI AURODIL EC+ NG

EMULSIFIABLE CONCENTRATE
IDEAL FOR CONTROL OF MITES,
FLYING AND CRAWLING INSECTS

STRICTLY FOR PROFESSIONAL USE

Composition

Permethrin (CAS 52645-53-1): 250 g/L
D-Tetramethrin (CAS 1166-46-7): 9 g/L
Piperonyl Butoxide (CAS 51-03-6): 150 g/L

Mode of action

PHOBI AURODIL EC+ NG is intended for the control of pest insects in public hygiene applications (bed bugs, fleas, mosquitoes, cockroaches, flies and ticks).

PHOBI AURODIL EC+ NG combines a rapid knockdown effect with long-lasting residual activity. The product acts in less than 10 minutes and remains effective for more than 4 weeks thanks to its formulation based on residual pyrethrins.

Strengths

- Strong flushing-out effect and rapid knockdown action,
- Odourless after dilution,
- Highly concentrated formula.

Instructions for use

PHOBI AURODIL EC+ NG is an insecticidal preparation to be diluted in water before use at the following rates: 50 mL in 5 L of water for maintenance treatments.

SURFACE TREATMENT:

Apply 1 L of diluted solution per 100 linear metres or 10 to 20 m².

Ensure adequate ventilation throughout the treatment period and thoroughly ventilate the treated area before re-entry (30 minutes to 2 hours, depending on the level of ventilation).

SPACE TREATMENT (hot or cold fogging):

- Indoor treatment: 1 L of diluted solution per 1,000 m³.
- Outdoor treatment: 1 L of diluted solution per 0.5 to 1 hectare against flying insects.

Remove animals and cover aquariums (switch off the pump) and terrariums before fogging. For optimum effectiveness, keep the treated area closed for 4 to 6 hours after application. Thoroughly ventilate the premises before re-entry.

Spraying (surface treatment): the use of protective gloves and a suitable filtering half-mask for protection against spray mists is recommended. Wash hands after use.

Fogging (space treatment): the use of a disposable full-body protective coverall, a full-face respirator, protective gloves, and boots is mandatory. Wash hands after use.

Packaging

500 mL dosing bottle – Box of 4 units

Storage and disposal

Store above 5°C. Keep unused product in its original tightly closed container. Keep out of reach of children and pets. Avoid contact with foodstuffs and food-contact surfaces. Store in a ventilated area away from heat sources. Do not reuse the container. Do not dispose of residues into drains or watercourses. Both the product and its packaging must be disposed of as hazardous waste under the responsibility of the waste holder.

Safety instructions

PT18 – Use biocidal products with care. Always read the label and product information before use. Dangerous product. Follow all safety instructions.

For first aid instructions, contact the nearest Poison Control Centre. The Safety Data Sheet is available free of charge upon request at: fds@lodi.fr

Always test surface compatibility before treatment by carrying out a preliminary test on a hidden area. Particular care should be taken with sensitive surfaces such as paints, varnishes, fabrics and waxed wooden floors.

Keep cats away from treated surfaces. This biocidal product contains permethrin, an active substance hazardous to bees and other pollinators. Do not apply directly to animals. Toxic to cats. If animals are exposed, consult a veterinarian.

For use in food processing and manufacturing facilities, all installations must be tightly covered before treatment. After treatment, rinse all surfaces that may come into contact with food.

DANGER
H304 May be fatal if swallowed and enters airways.
H317 May cause an allergic skin reaction.
H319 Causes serious eye irritation.
H410 Very toxic to aquatic life with long lasting effects.
EUH066 Repeated exposure may cause skin dryness or cracking.
